SANTIAGO TRIVIÑO

BACKEND DEVELOPER

ABOUT ME

Passionate back-end developer and systems engineering student with experience in building REST APIs and designing reliable databases. I enjoy the challenge of back-end development and working collaboratively with a team to bring innovative solutions to complex problems. Motivated to learn.

SOFTWARE PROJECTS

SAINT PATRICK SERVER:

- A collaborative project that allows client to register and have multiple cards to make movements such as deposit or transference.

- Client authentication including json web tokens via access token and refresh token with a specific time.

- Multiple currencies support.

- MongoDB transaction to protect client data. Built in nestjs

AUTHENTICATION API

- A RESTful API for users to register up and log in, protecting data by hashing the password, validating unique email and using json web tokens.

- Google OAuth2 implementation.

- Applied backend technologies such as Nodejs, typescript, Express, and MonngoDB.

SKILLS

- Backend development implementing clean code principal and clean architecture (Domain-Driven-Design)
- Problem-solving, teamwork, attention to details
- Proficient English level
- Knowledge of Database

KEY SKILLS

- Programming: JavaScript, typescript
- Frameworks: Express, nestjs
- Server environment: Nodejs
- Developing tools: Git, GitHub, Docker, Docker-compose
- Database: SQL(MySQL) and NoSQL (MongoDB)

EDUCATION

UNIMAR, 2021 – present
System Engineer

FreeCodeCamp, 2023
Backend Development and Apis
Credential:
freecodecamp.org/certification/fcc787ae2e6-50eb-46eb-9799-1c9246dd04f9/back-end-development-and-apis

EF English proficiency level, 2023
EF Standard English test (EF SET)
Credential: The official EF SET Certificate™ | Santiago Triviño

BANESCO, 2022
Micro Business fundamentals program.
Credential: banescovenezuela-universidadposible.teachlr.com/#certificate/31ed40263e40

FUNDAUC, 2017 – 2019
English course
